

This Dent 2018 presentation had a sneaky black-screen opening, so here are some instructions for viewing it online.

1. Start by hitting return once to “see” the black slide, and then a second time to hear music.
2. See if you recognize the short music clip you hear before you hit return again for a big hint (a second music clip).
3. Hit return again to see the slides...and then keep hitting return to go through the full presentation.
